**Successful kitten adoption day!**  
9 kittens & young cats found forever homes through our adoption day on 20/21 April! Very successful weekend. But all of this would not have been possible without the support of our amazing volunteers!! It is because of you beautiful people who make Queenstown Cat Rescue what it is today!! Thank you to you all - you know who you are... And we still have many more kittens available for adoption - we will update photos of kitties wanting homes on Facebook and our website soon!

**Where does the purr come from?**  
Purring originates in the vocal chords. The sound is produced as the chords vibrate, as they are rapidly pulled to and fro by the muscles in the walls of the larynx (or voice box). These muscles are, in turn, controlled by nerves that set the rhythm of the purr. We associate purring with pleasure, but cats may also purr after being involved in traffic accidents or when frightened, such as when they are at the veterinary surgery. (from 'Cats' by Dr Bruce Fogle)

Our Kitty of the month is Ginga Ninja. He is from one of our colonies in Queenstown, he is approx. 1.5 years old and de-sexed. He is very gentle and smoochy! He is a bit shy and suits a quiet environment. He loves cuddles and is very affectionate, he likes sleeping on your lap and purrs lots! He will be really good company once he gets to know you. If you are interested in visiting him, please contact Mayumi on 0274 940 540 or Nick on 0272 202 195
